- Emergency repair
- Experience in all major shale plays

Michels has earned a reputation as one of the most trusted, reliable pipeline contractors in North America. Our resume boasts 10,000 miles of new construction. We offer many services related to the construction and maintenance of mainline transmission pipelines.

- Pipeline construction
- Master service agreements (blanket contracts)
- Integrity management
- Relocations
- Interconnects
- Hydrostatic testing
- Launchers and receivers
- Emergency repair
- Experience in all major shale plays

Michels continues our tradition of being an innovative leader in trenchless technologies by adding the Direct Pipe method to our offerings. The combination of a thruster and steerable microtunneling machine allows a borehole to be excavated and prefabricated pipe installed in one pass.

- Precise guidance along pre-determined paths
- 1.6 million pounds of thrust force
- No damage to pipe or pipe coating
- Installations up to 4,500 feet
- Diameters from 36 to 60 inches
- Recycled drilling fluid
- Ideal for small sites
- Suitable for all ground conditions

Continental Fabrication Services (CFS) specializes in custom fabrication for oil, natural gas and product pipelines construction. CFS is conveniently located in north-central Missouri.
