

# ACCESS ROADS & WORK PADS

WE DO THAT ... & MORE

Michels Power, Inc. builds temporary access roads and work pads to create safe, environmentally sound jobsites for electrical transmission construction. As one of the largest private electrical contractors in the United States, we have the people, equipment and experience to perform the civil work needed to build roads and work areas capable of supporting equipment mobilization and construction functions in undeveloped or unimproved environments.

## Installation & Removal Services

### Access roads & work pads

- Timber mats
- Aggregates
- All weather conditions
- All ground and terrain conditions

### Environmental controls

- Resistant to wind and water erosion
- Minimal environmental impact
- Adheres to Stormwater Pollution Prevention Plan (SWPPP) sediment and erosion control requirements
