

End-to-end solutions for construction, expansion and maintenance of facilities for carbon capture, oil, gas, renewable natural gas, power and hydrogen.

FACILITIES

WE DO THAT ... & MORE

Safety

We incorporate safety into everything we do. The truest measure of safety performance is seeing our people return home safely each day. We are honoured to receive awards from our industries and partners recognizing our commitment to safety initiatives.

Constructability and ECE

Constructability reviews and Early Contractor Engagement (ECE) allows our team use our insights and expertise to suggest ways to optimize design plans and provide a singular point of contact, unified standards for quality and safety, and efficiently use our vast resources.

Unmatched resources

Michels Canada supports our crews and projects with one of the largest collections of modern, efficient equipment in the industry. All 18,000 pieces of equipment are maintained, enhanced, and fortified by our in-house team at strategically placed locations throughout Canada and the USA.

We Do That

Carbon capture facilities
Compressor stations
Hydrogen facilities
Meter stations
Pipeline facilities
Pump facilities
RNG facilities
Renewable energy facilities

... & More

Brownfield & greenfield
Civil works
Coating
Commissioning support

Canadian Council for
**ABORIGINAL
BUSINESS**

Cooperation & Integration

We constantly seek new and innovative approaches to engage Indigenous Peoples of Canada. Our projects work in communities creating social and economic benefits, so we give back whenever possible.

Education, training, employment opportunities, contracting good and services from local businesses, fundraisers and events create ways to give back to the community. Michels Canada is committed to strengthening our bond with Canada's Indigenous Peoples.
