Building Canada's Future

Michels Canada was founded to address customers' needs for a construction partner to provide Canada with clean energy solutions while protecting its vast natural resources. An integral part of the Michels International Holdings, Inc. portfolio, Michels Canada initially served Canadian customers through U.S.-based operations. As the business expanded, we cemented our roots in Canada by formally establishing Michels Directional Crossings Company in 1997 (renamed Michels Canada in 2006).

Since then, we have built the strongest team and best safety culture for providing reliable energy, energy transition, heavy civil and power solutions. We stake a claim as the country's best in pursuing Canada's safer, cleaner, more sustainable future.

ENERGY

Michels Canada designs and builds reliable, tested, meticulously maintained solutions to ensure safe, swift delivery of renewable and traditional energy. Michels Canada uses time-tested techniques and new technology for long-distance movement of Canada's liquid and gas resources. Count on us to deliver safe, creative and efficient trenchless and conventional solutions for your energy projects.

Our project managers and crews have completed significant pipeline projects throughout Canada, working in dense urban and remote rural areas with an uncompromising commitment to safety and environmental protection.

Our capabilities include:

- Transmission pipelines
- Distribution pipelines
- Facilities
- Auger boring
- Direct Pipe®
- Horizontal directional drilling (HDD)
- Microtunneling
- Emergency repair
- Hydrostatic testing
- Integrity management
- Master service agreements
- Relocations

ENERGY TRANSITION & RENEWABLES

Our technical abilities support Canada's energy transition and advancements in renewable energy. We offer design and construction solutions for decarbonization initiatives, including solar, wind, hydrogen, carbon capture, battery energy storage and renewable natural gas (RNG) projects.

HEAVY CIVIL

Michels Canada self-performs all facets of complex civil projects to provide water, sewer and industrial customers with consistent safety and quality. Our techniques are expansive, and our people pursue a unified goal: providing our customers with strategies to meet the public's needs thoughtfully and effectively.

Our capabilities include:

- Water mains & pipelines
- Sewer drainage pipelines
- Water conveyance systems
- Concrete structures & shafts
- Auger boring
- Direct Pipe®
- Horizontal directional drilling (HDD)
- Tunnelling
- Microtunnelling
- Sewer & water pipeline rehabilitation
- Maintenance hole & culvert rehabilitation
- Cured-in-place pipe (CIPP) relining
- Spray-in-place pipe (SIPP) rehabilitation
- Geopolymer & cement mortar
- Sliplining

BUILDING A SOLID FUTURE

Our work today makes for a better tomorrow by providing safe, reliable energy and infrastructure delivery options.

POWER

Michels Canada approaches electrical transmission, distribution and substation projects with experience, resources, grit and confidence earned during the more than 25 years we have been building Canada's energy infrastructure. We are committed to the construction of safe, reliable electrical power delivery systems.

Our capabilities include:

- Transmission lines
- Distribution lines
- Overhead & underground facilities
- Substations
- Energized line work
- Emergency & storm response
- Renewables (solar & wind)
- Structure foundations
- Structure assembly & erection
- Site cleaning
- Access roads & work pads
- EPC delivery models

We are devoted to building a solid future for our team and our customers by continually investing in training, equipment and technology.

Safety: The Cornerstone of our Culture

Michels Canada is committed to performing safe, specialized services to support Canada's prosperous future. We construct reliable solutions for the public's infrastructure needs.

Our project managers and crews work out of three strategic geographic locations: Edmonton (Nisku), Vancouver and Toronto. These locations allow us to mobilize people, equipment and other resources quickly. Whether operating independently or collaborating on a project, the Michels Canada team upholds our Core Values, quality standards and world-class reputation.

Michels Canada is honoured to be the 2022 Gold Winner for Canada's Best Health & Safety Culture by WSIB. This recognition is a testament to everyone at Michels Canada, whether they wear a hard hat and work in the field or provide critical support services from our offices and yards. Michels Canada is built on a passion for continuously improving our safety culture and never taking it for granted.

THE MICHELS FAMILY OF COMPANIES

The Michels Family of Companies is a collection of wholly owned infrastructure and energy contractors providing solutions under the Michels brand flagship. All companies perform safe, unique, and specialized services for energy, foundations, renewables, marine, transportation, civil and water and wastewater industries. Whether operating alone or collaborating on a project, all members of the Michels Family of Companies are united by shared Core Values, quality standards and a world-class reputation upheld by Michels since 1959. Our customers receive innovative solutions, consistent quality and the convenience of one key point of contact.
