

MI-TECH SERVICES, INC.

Overview

As a full-service engineering, design, and construction services firm, Mi-Tech delivers comprehensive support for utility and infrastructure projects from planning and design through execution. Our multidisciplinary team provides practical, innovative solutions that emphasize cost efficiency, constructability, and long-term value.

United under Mi-Tech's vision to give our clients the best service, solutions, and workforce to succeed, we serve the civil, energy, geosstructural, mission critical, telecommunications, transportation, and water and wastewater industries as well as private parties.

ENGINEERING & DESIGN

Mi-Tech combines practical, technically sound designs, feasibility studies, and bid documents with an array of support services, resulting in achievable solutions for complex challenges. Our knowledge is backed by experience gained through thousands of projects, including some of the most complex and significant projects in the world.

- Trenchless engineering
- Geotechnical engineering
- Geostuctural engineering
- Energy distribution designs
- Telecommunications designs
- Civil engineering

ASSESSMENTS & ANALYSIS

With a drive to expand the limits of what can be achieved, Mi-Tech helps customers develop safe, technically sound plans. Our assessment and analysis services are based on our earned understanding of geological conditions, machinery capabilities, risk factors, and more.

- Feasibility assessments
- Construction cost estimating
- Storm services & damage assessment
- Design reviews

SUPPORT

We have the desire to expand the limits of what can be achieved. Mi-Tech provides essential technical services before, during, and after construction. We pride ourselves on seeing even the most complex projects through, gathering information to optimize designs and minimize risks on projects of all sizes.

- Permitting
- BIM and 3D modeling
- Contract documents
- Lift plan development
- Construction monitoring
- CIPP lab services
- Environmental
- Geographic information systems
- Joint use coordination
- Pole integrity
- Surveying & real estate

ABOUT *Mi-TECH*

Founded in 1985, Mi-Tech has built a reputation for excellence in engineering, design, environmental, laboratory, technical, and field services across multiple industries. The 2026 merger with J.D. Hair & Associates further strengthened our capabilities and resources, adding decades of specialized expertise in trenchless, geotechnical, and structural engineering to our core offerings. As a member of the Michels Family of Companies, Mi-Tech collaborates with an internationally respected team to deliver integrated, end-to-end engineering, design, and construction solutions that meet the highest standards of quality and performance.

MARKETS SERVED

- Telecommunications
- Oil & gas
- Power
- Waste & wastewater
- Deep foundations
- Mission critical
